Education

Birla Institute of Technology and Science, Pilani – Pilani Campus

B.E. Electrical and Electronics Engineering (Current student)

Year of Graduation : 2020

Bio

I am a developer and develop in many languages including, but not limited to JavaScript, Node.js, Python, C/C++. Most of my experience is in Web Development. I pick up new technologies with ease.

Experience

Google Summer of Code 2017 (June 2017 - Present)

I am currently a GSoC student for the organization **PublicLab**. My project is to create a system for image manipulation. The repository for the same can be found [here](#). The project is in Node.js.

Jhunjhunu District Court (January 2017 - Present)

I am working on a project for the District Court of Jhunjhunu, Rajasthan. This project aims at reducing corruption and the digitization of file copying system. It involves creating a WebApp. Upon success, the project will be replicated across the state of Rajasthan. The project's backend is written in PHP.

Team Work

DVM BITS Pilani (August 2016 - Present)

I am a front-end developer at the Department of Visual Media (DVM) in BITS Pilani. It is responsible for developing Websites, Mobile Applications, Registration Software and Trailers, Teasers, Videos of the fests at BITS Pilani. My major contributions have been to the **BOSM Intro Website**. [This](#) is the link to the Department GitHub organization.
